Summary

DevOps and Cloud Engineering student with hands-on experience designing and automating AWS infrastructure using Terraform, Kubernetes platforms, and GitHub Actions CI/CD pipelines. Skilled in Configuration & Infrastructure as Code (IaC), cloud-native technologies, and observability solutions including Prometheus and Grafana.

Technical Skills

CI/CD: Git, GitHub Actions

Cloud: AWS (S3, EC2, EKS)

Infrastructure: Terraform, Docker, Kubernetes (K3s)

Configuration: Ansible, Nix

Languages: Bash, Go, Python, TypeScript, JavaScript, C

Frameworks & Libraries: Express.js, React.js

Databases: PostgreSQL, MongoDB

Monitoring & Observability: Prometheus, Grafana

Projects

CLOUD, INFRASTRUCTURE & GITOPS

Declarative & Versioned Infrastructure | AWS, Cloudflare, Terraform, GitHub Actions

2025 - Present

- Managed **AWS IAM roles/policies** and **Cloudflare DNS** declaratively using **Terraform**.
- Built **GitHub Actions CI/CD** pipelines with automated **terraform fmt, validate, plan, apply**.
- Implemented secrets management with **SOPS + Age encryption** for Terraform variables and API credentials. Along with remote state on **AWS S3** with versioning and encryption.
- github.com/tech1savvy/infra

GitOps Kubernetes Platform on AWS | Nix, GitHub Actions, Terraform, K3s, Prometheus, Grafana

Feb 2026 - Present

- Personal **declarative Kubernetes** platform for DevOps practice and app hosting.
- Provisioned a **K3s** Kubernetes cluster on **AWS** using **NixOS** declarative infrastructure (Flakes + deploy-rs).
- Built automated **CI/CD pipelines with GitHub Actions** (OIDC auth, Terraform validation/plan/apply) and **secrets management (SOPS + Age)** for IaC and Kubernetes secrets.
- Configured **observability stack** with **Prometheus, Grafana**, and custom alerts.
- Reproducible rebuilds in under 10 mins, hosting personal projects.
- github.com/tech1savvy/homelab

SYSTEMS AUTOMATION

NixOS Configuration | Nix, GitHub Actions

June 2024 - Present

- Maintained a reproducible NixOS setup using **flakes** and **Home Manager**, reducing system configuration time by 90% through automation.
- Configured **Btrfs + Disko** for snapshots and rollback; automated **CI** checks on builds.
- github.com/tech1savvy/dotfiles

WEB DEVELOPMENT & CONTAINERIZATION

Touch Typing Test Platform: Key-Sensei | React, Express, MongoDB, Docker, GitHub Actions

Nov 2025 - Dec 2025

- Built a touch-typing web platform using **React** and **ExpressJS**.
- Featuring real-time validation, animated cursor, visual keyboard, and **pub-sub event architecture**. And **RESTful** API with **JWT auth**, MongoDB persistence, Docker **containerization**, and GitHub Actions **CI/CD**.
- Deployed to production (keysensei.tech1savvy.me) allowing users to register, login, and test their typing speed.
- github.com/tech1savvy/key-sensei

Certifications

- Learn Docker | boot.dev
- Learn CI/CD with GitHub Actions, Docker and Go | boot.dev
- Learn Kubernetes | boot.dev

Jan 2026

March 2026

May 2026

Education

B.Tech in Computer Science Engineering, Lovely Professional University

- CGPA: **8.34** | Minor: **Full Stack Web Development & DevOps**

2022 - 2026

Jalandhar, Punjab
