Projects

GitOps Kubernetes Platform on AWS, DevOps

Feb 2026 - Present

- Personal **declarative Kubernetes** platform for DevOps practice and app hosting.
- Provisioned a **K3s** Kubernetes cluster on **AWS** using **NixOS** declarative infrastructure(Flakes + deploy-rs), with **CI/CD** pipelines via GitHub Actions using OIDC-based AWS authentication and **SOPS + Age** encryption for secrets management. Configured **observability stack** with **Prometheus**, **Grafana**, and custom alerts.
- Automated GitOps infrastructure with reproducible rebuilds in under 10 mins, hosting personal projects.
- github.com/tech1savvy/homelab 🔗

Pokedex CLI, Go

Feb 2026

- Enable users to explore and interact with Pokemon data from the PokeAPI via a **CLI client**.
- Built a custom REPL supporting commands like map, explore, catch, and pokedex. Implemented a thread-safe **in-memory cache** using mutex-based **concurrency control** with a background goroutine and scheduled cleanup timer for **automatic cache invalidation**.
- Learned Go concurrency, HTTP clients, and building fast CLI interfaces with in-memory caching.
- github.com/tech1savvy/pokedex-go-cli 🔗

Asteroids: Retro Arcade Game, Python

Jan 2026 - Feb 2026

- Recreated the classic Asteroids arcade game using Python and **Pygame**.
- Architected the system using **OOPs** design, leveraging inheritance to manage complex interactions between players, projectiles, and asteroids. Implemented core game mechanics including collision detection, asteroid spawning, and procedural splitting.
- Gained hands-on experience with Python, OOPs, and working with external libraries.
- github.com/tech1savvy/asteroids 🔗

Touch Typing Test Platform: Key-Sensei, MERN

Nov 2025 - Dec 2025

- Built a touch-typing web platform using **React** and **ExpressJS**.
- Featuring real-time validation, animated cursor, visual keyboard, and **pub-sub event architecture**. And **RESTful** API with **JWT auth**, MongoDB persistence, Docker **containerization**, and GitHub Actions **CI/CD**.
- Deployed to production (keysensei.tech1savvy.me 🔗) allowing users to register, login, and test their typing speed.
- github.com/tech1savvy/key-sensei 🔗

Certifications

- Learn CI/CD with GitHub Actions, Docker and Go | boot.dev 🔗
- Learn Data Structures and Algorithms in Python | boot.dev 🔗
- Functional Programming in Python | boot.dev 🔗

March 2026

Feb 2026

Jan 2026

Technical Skills

Languages: Go, Python, TypeScript, JavaScript, C

Frameworks & Libraries: Express, React, Vitest, Drizzle ORM

Databases: PostgreSQL, MongoDB

CI/CD: Git, Docker, GitHub Actions, Ansible, Terraform, Nix (declarative builds)

Cloud & Infrastructure: AWS, Kubernetes (K3s)

Education

Lovely Professional University Punjab

Computer Science Engineering — CGPA: **8.34**

2022 - Present

Jalandhar, Punjab

Army Public School Kirkee

12th with Science — Percentage: **78.2%**

2021 - 2022

Pune, Maharashtra

Army Public School Jaipur

10th — Percentage: **93.4%**

2019 - 2020

Jaipur, Rajasthan
